

TNT FACE MASKS

They are made by woven non woven, with 3 plies, completely free of glass and asbestos fibres. Available with long bands and with round cotton elastic in green and light blue colours.

This is a surgical medical item CE Class I (with Ministry Certification with Technical File nr. 07-I-CE-TNT-01 dated 11.06.2003) and it's conforming to 93/42/CEE Directive.

It's a disposable item so once it has been used it has to be thrown away because it can't be used twice.

- Outside ply is made by waterproof woven non woven material (Delta P 3)
- Medium play is made by polypropylene tissue with high filter capacity (B.F.E. 95% for particles until 1 micron dimensions)
- Inside ply is made by hypoallergenic woven non woven material.
- Both outside and inside woven non woven material allows a perfect breathing.
- Nose band is made by soft aluminium, and it is in the higher part of face mask with the same length of face mask.
- Filter efficiency 0,3 y
- Rate L/MIN. CM3 0,6
- Strength % 19,6
- Fiber Ø <4 y
- BFE 95%

(Efficiency % sodium flame method)

Packing : Box of 50 pcs
 Carton of 20 boxes

Face masks are checked on MIL-STD 105E basis following AQL 0,65 S.I.L. S-2 for functional and dimensional controls and AQL 1,5 G.I.L. I for visual controls. AQL means "Acceptable Quality Level" and for each lot and on the total quantity we check "x" products with a special and strict criterion.

We inform the end-user that face masks have to avoid direct sunlight and they have to be stored in a dry place: if it is stored at the above conditions there is no expiry.
